

## Acoustic Louvres – PHZE

### Installation manual

Louvers provide effective protection for air intake and exhaust openings in technical installations. They are suitable for various applications, including commercial and industrial construction, infrastructure, offshore projects, and the shipbuilding industry.

### Product Application

---

- Louvers for high-, medium- and low voltage areas
- Transformer- and switching stations
- Transformer substations for gas
- Gas storage spaces
- Engine rooms and rooms for compressors
- Emergency power supply aggregate (NSA) rooms
- Parking garages
- Prefab enclosures
- Special louvers for offshore applications

# VIBRATEC

Quietly Improving Your Environment

## Engineering, Production and installation

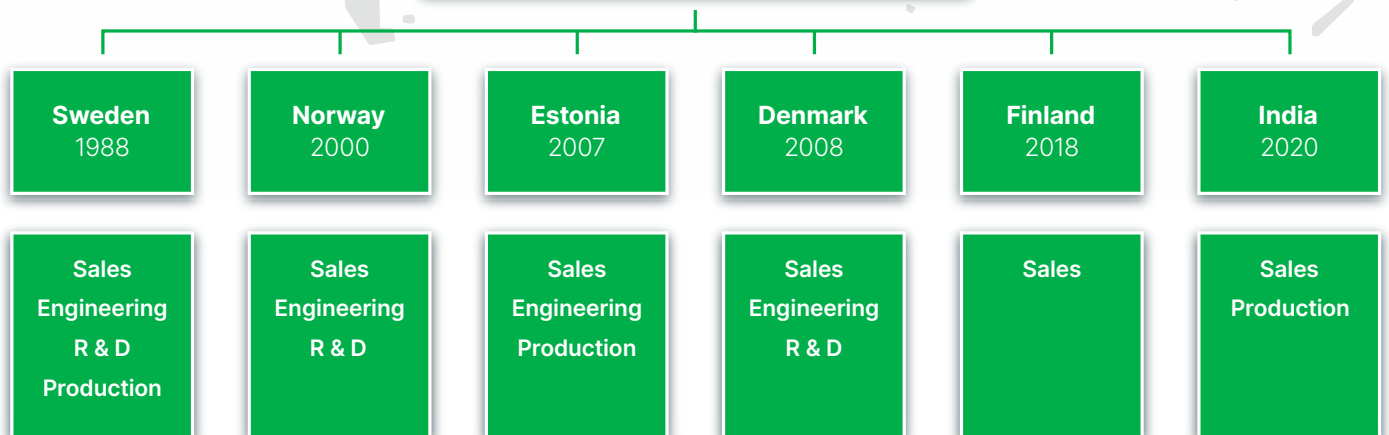

Vibratec has extensive experience, combined with the use of modern tools, when we design and manufacture tailor made solutions in all areas of vibration and noise reduction. Vibratec performs test to evaluate mechanical, physical and long term behaviour on materials as well as complete solutions.

## Construction, Defence, Industrial, Marine, Offshore and Railway

Vibratec Akustikprodukter is one of Scandinavia's leading suppliers of noise and vibration solutions. Vibratec's ambition is to become the preferred choice for customers who need solutions to noise, vibration and shock problems. Vibratec produce and store many products for damping / isolation of vibration, shock and noise over a wide range of applications.
